Welcome to the Cohesity Family!

Data is exploding, and becoming the most valuable resource in the world.

This is why we’re excited to be working with you to solve mass data fragmentation, consolidating the silos of data you have across different locations, clouds, and management systems that prevent you from fully leveraging all of your data for business value.

Our mission is to simplify data management. To empower your team to tap into all of your enterprise data—in backups, archives, file shares, object stores, and data used for dev/test and analytics—to derive insights that give your organization a competitive edge.

We’re customer-obsessed (it’s a core value) with a world-class support team, focused on your success. We pride ourselves on maintaining excellence.

In this handbook, you’ll find details about everything you need to get started—from our internal Support and Helios portals to our Galaxy community—as you begin your relationship with Cohesity.

Our success only happens when YOU are successful, so stay in touch. Let us know what works and doesn’t work for you so we can continue to improve and keep learning. I’m looking forward to hearing from you as we redefine data management.

Sincerely,
Andrew Dobrov

Terms and Conditions

Cohesity Support and Maintenance Terms and Conditions (the “Support Terms”) apply to any customer (“Customer”) who is entitled to receive support services from Cohesity, Inc. (“Cohesity”) for specific Cohesity software product(s) (the “Software Product”) and/or hardware product(s) (the “Hardware Product” and together with the Software Product, “Products”) pursuant to a written agreement or order between Customer and Cohesity (or its authorized reseller or distributor, as applicable) (an “Agreement”). Customer is entitled to receive only the support specified for the applicable Support Level and term that Customer has ordered and paid for pursuant to such Agreement. To the extent Cohesity has become obligated for support and maintenance, the following will apply with respect to Products so long as they remain Cohesity’s standard terms for support and the Customer is in full compliance with Cohesity’s end-user agreement (the “EULA”).
Our Services & Support Commitment to You

The Cohesity technical team is dedicated to providing your organization with complete, responsive, high-quality services, boosting your experiences with Cohesity products. Our services and support commitment to you focus on delivering:

- Enterprise-grade support and services
- World-class online experiences
- Global scalability

Staffed by talented professionals—with expertise honed at enterprise industry leaders such as VMware, Cisco, Google, Nutanix, and more—our support and services professionals strive to always provide the highest level of customer satisfaction.

Whether you are deploying Cohesity software on Cohesity appliances, in the cloud, in hypervisors, or deploying Cohesity on one of our certified partner appliances, you can expect:

- Timely and knowledgeable responses for fast case resolution
- Easy access to software
- Up-to-date documentation
- Helpful and current knowledge base articles
- Visual dashboarding of your cluster information
- Peer-to-peer community engagement opportunities
- Accurate information to assist your decision making
Our Support Program Overview

Cohesity support and services professionals work in combination with our appliance and application partner technical support teams to address your questions and successfully solve your issues. The following table outlines the program and first point of contact, based on your deployment:

<table>
<thead>
<tr>
<th>Cohesity Solution</th>
<th>First Point of Contact</th>

<td>Installation issues - contact Cohesity Support.</td>
</tr>
<tr>
<td></td>
<td>Applications issues - contact application vendor.</td>
</tr>
</tbody>
</table>

For software issues, open a case with Cohesity. For hardware issues, Cohesity advises following the [published field replacement guides](#), and Cohesity Support is available to review a suspected hardware issue. Hardware replacements must be requested directly from the hardware vendor. Cohesity Support is available to assist you and the hardware vendor during the replacement process.

If you are unsure where to open a case, the Cohesity Support team is trained on partners' solutions and can help refer you appropriately.

Learn more about service for Cohesity and partner’s solutions:

- [Cohesity and HPE Greenlake](#)
- [Cohesity and Dell solutions](#)
Cohesity Software Support

The following levels apply to you if your organization has Premium support and maintenance services from Cohesity. For more information, review the Cohesity Support and Maintenance Terms and Conditions.

<table>
<thead>
<tr>
<th>Priority Level</th>
<th>Cohesity Response Time Obligation</th>
<th>Initial Response Time</th>
</tr>
</thead>
</table>
| Priority 1     | Respond within an hour and promptly begin the following procedures:  
(i) assign Cohesity engineers to correct the error;  
(ii) notify Cohesity management that errors have been reported and of steps being taken to correct error(s);  
(iii) provide Customer with periodic reports on the status of the corrections; and  
(iv) in the case of software products, initiate work to provide a workaround or fix or, in the case of hardware products, initiate hardware support based on hardware support terms. | 1 hour |
| Priority 2     | Respond within the relevant time and promptly commence the following procedures:  
(i) assign Cohesity engineers to correct the error;  
(ii) provide periodic reports on the status of the corrections; and  
(iii) in the case of software products, initiate work to provide a workaround or fix or, in the case of hardware products, initiate hardware support based on hardware support terms. | 2 hours |
| Priority 3     | 3 hours |
| Priority 4     | Use reasonable efforts to acknowledge the problem, report and commence reasonable efforts to supply a fix for the error. | Reasonable efforts |

IMPORTANT: Cohesity supports qualified hardware from third-party vendors. Customers should update such qualified hardware and associated firmware to the minimum supported levels as listed in the product documents on the Cohesity Support site.
Cohesity Hardware Support

If you are using Cohesity hardware products and have purchased a hardware support agreement, then Cohesity will deliver to you, at no charge, the replacement parts that Cohesity determines are required within the Part Delivery Time:

<table>
<thead>
<tr>
<th>Location</th>
<th>Parts Delivery Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>USA (incl. Hawaii, Alaska, Puerto Rico)</td>
<td>Next Business Day</td>
</tr>
<tr>
<td>EU Countries &amp; UK</td>
<td>Next Business Day</td>
</tr>
<tr>
<td>Non-EU Countries in Europe</td>
<td>Best Efforts</td>
</tr>
<tr>
<td>Australia, Singapore, Japan, China (Beijing,</td>
<td>Next Business Day</td>
</tr>
<tr>
<td>Shanghai, Shenzhen, Guangzhou)</td>
<td></td>
</tr>
<tr>
<td>Rest of World</td>
<td>Best Efforts</td>
</tr>
</tbody>
</table>

Add-On Services (may be added for an additional fee):
- Hardware Non-Return Option
- 4-hour Hardware Services (designated locations only)

Please note, actual delivery times might vary if your location is remote and/or if common carriers encounter delays or require special transportation arrangements for reaching your site, or if Customs clearances impose delays. As part of the Return Material Authorization (RMA) process, a case is required for hardware troubleshooting and product (or part) replacement. For more information on the RMA process, review the [Cohesity Support and Maintenance Terms and Conditions](#).

Cohesity does NOT support hardware other than Cohesity’s own Hardware Products. Although we don’t open cases with hardware vendors on your behalf and cannot arrange your RMAs, we can guide you to the right people and places.

**U.S. Federal Government Customers**

For existing qualified U.S. federal government customers, you are entitled to all of our Premium support benefits, and your requests will be handled by U.S. citizens. We have a dedicated support number for your convenience: **1-202-470-1821**
Availability of Our Technical Teams

We strive to serve your organization with local support professionals from our offices in North America, Asia-Pacific, and Europe.

Contact Our Support Team

You can reach our Cohesity technical support professionals every day of the year, at all times of the day.

Visit us on the Web: [https://support.cohesity.com/login](https://support.cohesity.com/login)

Via phone: For the full list of global technical support numbers, visit our [Cohesity Support page](https://support.cohesity.com/login).
MyCohesity: All in one place

MyCohesity provides users with one account and one password, so you can navigate and manage all of the Cohesity resources you have access to without hassling with multiple locations, logins and passwords. The portal provides a single place to access:

• Helios
• Support Portal
• User Groups
• Academy
• Product Documentation
• Galaxy
• Partner Portal

With this fast, centralized access to all resources and the ability to seamlessly transition from one service to another without disruption, our goal is to increase engagement and deepen our relationships.

If you are a new user to Cohesity you can just sign up (top left from picture below) for a new account at MyCohesity. Alternatively, your Helios Administrator can give you access to MyCohesity by adding you as a user. You will receive a welcome email with your username and a link to activate your account and set your password. The first person in your organization given access to MyCohesity portal by your Cohesity Account Team will have Helios Admin access.
Cohesity Helios

Cohesity Helios is a SaaS-based platform that combines a single, global user interface (UI) with built-in machine learning to provide you operational insights and actionable recommendations to help meet your SLAs and ensure business continuity. Connecting clusters to Helios dramatically simplifies managing all of your data and applications, wherever they are distributed across a hybrid landscape, from data centers, to edge environments, to public clouds.

You can access Helios going directly to helios.cohesity.com using MyCohesity credentials. If you are using an Identity Provider to login to Helios then use your SSO credentials.

With Helios, you can:

- Manage all your Cohesity clusters from a single UI.
  **NOTE:** Make sure your clusters are connected to Helios.
- Generate global reports for deeper visibility.
- Search and take actions across your global footprint.
- Monitor your clusters continuously.
- Orchestrate cluster upgrades.
- Proactively plan for emerging business requirements with capacity prediction.
- Monitor machine learning-based anomalies detection for ransomware attacks.
- Download and manage applications from the Cohesity Marketplace.
- Add users to the support channel and manage their permissions.

Helios also provides a proactive wellness mechanism that auto-generates cases based on predictive alerts, cluster alerts, and bundle logs (see the full list of proactive alerts in our Helios Auto-generated Cases for Proactive Wellness knowledge base article). The contact information used for auto-generated cases and notifications is determined by the contact email address that you associated with the cluster during cluster registration. It’s crucial that you have an email address associated with each of your clusters. If you need to update the contact for a cluster, please contact our support team.

Learn more about Helios in the online Help.

DMaaS - Data Management as a Service

DMaaS is our portfolio of offerings built atop the Cohesity Helios platform, radically simplifies the way data is backed up, secured, governed, and analyzed. It provides capacity-based pricing, eliminates infrastructure and silos, and consolidates data from multiple use cases such as data backup and archiving, disaster recovery, file and object services, copy data management, and analytics - all provided through a Software as a Service (SaaS) delivery model.

Cohesity DataProtect delivered as a Service provides backup and recovery capabilities (BaaS).

Cohesity SiteContinuity provides SaaS-based automated disaster recovery failover and failback orchestration to the AWS public cloud for disaster recovery as a service (DRaaS). DRaaS is currently in preview.

Learn more about DMaaS here, and how to get started in the Cohesity Helios Help.
Cohesity Support Portal
Visit the Cohesity Support portal to explore all of our resources and programs. From there you can:

- Create and manage existing cases.
- Access and download Cohesity software updates.
  NOTE: If the cluster is connected to Helios, you can do this directly in Helios.
- Access product documentation and knowledge base articles.
- Submit IDEAS and feedback, and vote on new product ideas
- Contact support via email or phone

Create a New Support Case
To expedite your request the first time through and in subsequent requests, make sure you have this information to open your Cohesity Support case online, by email, or phone:

- **Account Name.** Your company name.
- **Contact Name.** Your name and email.
- **Cluster Id.** Your cluster’s Id number.
- **Type of issue.** Configuration, Documentation, Errors or Alerts, Hardware, etc.
- **Description.** A detailed description of your issue and its impact on your business.
- **Priority.** Select the number that reflects the impact of the issue on your business.
The priorities definitions and their initial response time are:

<table>
<thead>
<tr>
<th>Priority Level</th>
<th>Priority Definitions</th>
<th>Initial Response Time</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Priority 1</strong></td>
<td>Error that causes the production use of a product to be stopped, or so severely affected that you cannot reasonably continue to use the product. The diagnosis and resolution of the issue might require remote access to the system (that is, you might need to enable the Support Channel). NOTE: If remote access is not available, you might be required to access the system console to review error messages or to run diagnostics on the system and supply the results.</td>
<td>1 hour</td>
</tr>
<tr>
<td><strong>Priority 2</strong></td>
<td>Error causes important product features to be unavailable (and, in the case of software products, with no acceptable workaround), but your production use is capable of continuing. Priority 2 issues are addressed during your local business hours—8:00 AM to 5:00 PM (excluding weekends and public holidays in the United States, unless continuous effort is required). If continuous effort is required, you must be able to provide complimentary resources to work with Cohesity Support.</td>
<td>2 hours</td>
</tr>
<tr>
<td><strong>Priority 3</strong></td>
<td>Error causes important product features to be unavailable (but, in the case of software products, a workaround is available), or less significant software product features to be unavailable, but your production use is capable of continuing. Priority 3 issues are addressed by Cohesity Support during your local business hours—8:00 AM to 5:00 PM (excluding weekends and public holidays in the United States, unless continuous effort is required).</td>
<td>3 hours</td>
</tr>
<tr>
<td><strong>Priority 4</strong></td>
<td>For general questions or inquiries about recommended product modifications. There is no loss of service. Priority 4 issues are addressed by Cohesity Support during your local business hours—8:00 AM to 5:00 PM (excluding weekends and public holidays in the United Status).</td>
<td>Reasonable efforts</td>
</tr>
</tbody>
</table>
Cohesity Cases Involving Hardware

Any potential Cohesity hardware-related issues require a case for hardware troubleshooting and product (or part) replacement to be opened. All returns must be authorized and assigned a Return Materials Authorization (RMA) number in advance by Cohesity Support staff.

Replacement products and components are shipped to end users, systems integrators, and resellers based on instructions from Cohesity Support. Our products and components that are (A) covered under the terms and conditions of Cohesity's Express Limited Warranty, or (B) covered under a purchased support package, must be pre-authorized for return by Cohesity with an RMA number marked on the outside of the package and packaged appropriately for safe shipment.

If our Support staff determine that a replacement part (or product) is needed, a replacement will be shipped. You (or your designated service provider) will receive a dispatch number that also acts as your RMA number. We pay all freight charges for returned Covered Products or components via a Cohesity-designated carrier. If your support level allows you to keep defective hardware parts, there is no need to return them to us. However, all other defective hardware parts must be returned via our RMA process.

The case SLA resets to the contractual SLA when a case is transferred from Cohesity to the certified hardware partner and from a certified hardware partner to Cohesity.

Cohesity Case Escalation

You can raise the priority of your case based on business impact at any time. To begin an escalation, open the case that needs to be escalated, click Attention Needed, and provide the reason and details for the escalation. If you have Platinum service (check your asset inventory), you can contact your Cohesity TAM (Technical Account Manager) resource to escalate the case.

If your request is not addressed within a reasonable time, our system automatically notifies our second-line management. All escalation requests notify both the engineer working on your issue as well as our management team.
Proactive, Automated Techniques to Speed Case Resolution

We use two solutions with innovative techniques to speed your case resolution: the Cohesity Support Channel and Cohesity Helios Support Automation.

Cohesity Support Channel

This is a secure, simple, and effective way for our Support Engineers to provide you with on-demand assistance. When the Support Channel is enabled, one of our qualified Support Engineers can log in to your Cohesity cluster to troubleshoot and solve your issue remotely.

Our Support Channel server is located in the public cloud and has a secure login mechanism. The server is configured with a public key and accepts connections only from the Cohesity cluster and authorized Cohesity personnel. The cluster chooses one node as the master node and that node initiates a 2048-bit RSA-encrypted tunnel on TCP port 22 with the server. (Contact Support if you prefer to use another port.) This ensures that all communication is encrypted between the Support team and the cluster. The server configuration is restricted to a limited set of Support Engineers and a strict user registration policy is enforced and audited on a regular basis.

You can turn access off, turn access on, or provide temporary access for a set period of time to provide our Customer Support personnel access when needed for support purposes. Support Channel access is off by default.

Typically, the Support Channel is used by our Support team to download support logs, examine current system settings, and view job progress for problem diagnostics. All Support Channel usage is tracked and logged.

The diagram below illustrates how our Support Channel works.

For instructions on enabling and disabling the Support Channel, see Manage the Support Channel in the online Help.
Cohesity Helios Support Automation

Cohesity Helios Support Automation is enabled by default to detect issues and help you ensure you meet your business SLAs. To do this, Helios collects metadata from managed clusters for the purpose of monitoring, reporting, and providing interactive management.

Helios collects the following metadata from the cluster:

- Alerts
- Cluster configuration and status
- Firmware information
- Time capsule for troubleshooting (that is, debug logs, Linux command outputs, and custom settings on the cluster)
- Audit logs
- Statistics
- Rest API outputs
- Objects discovered from various sources
- Protection Group and Protection Run details
- Dashboard, users, and groups activity

Cohesity Helios Support Automation works on an opt-out model. It enables a proactive wellness mechanism that auto-generates cases based on predictive alerts, cluster alerts, and bundle logs. For more information, see the *Helios Auto-generated Cases for Proactive Wellness* knowledge base article.

Verify that port 443 is open for the following targets:

- eagle.cohesity.com
- helios-data.cohesity.com
- helios.cohesity.com

Helios collects metadata:

- **Daily**. Includes logs for troubleshooting
- **In real time** (every 15 minutes). Includes alerts, cluster configuration, and statistics for the last 15 minutes (but does not include logs)

We retain the raw metadata for only 15 days, but we hold onto the processed metadata required for some use cases, such as capacity prediction and proactive wellness.

Helios does not collect customer data residing on the Cohesity cluster; only the related metadata is collected and analyzed.
Metadata Encryption

Helios encrypts metadata in flight and at rest by default and takes a multilayered approach. Specifically, in flight, the metadata is encrypted using HTTPS over the TLS 1.2 protocol, and at rest, the public cloud infrastructure encrypts the metadata using the AES-256 standard.

Helios leverages the services provided by the cloud platform vendors to manage and encrypt the metadata and keys that are stored at rest in cloud storage services. This ensures that all the metadata that we store are encrypted, secured, and protected from unauthorized access.

When Cohesity Closes Your Case

Once your case—regardless of priority—has been resolved, we mark it closed. When your case is closed, you will automatically receive a satisfaction survey. Please take a few minutes to complete it as it helps us identify areas for improvement and when appropriate, celebrate achievement.

Accessing Cohesity Software

You can use your Cohesity Support portal account login credentials to access the latest Cohesity software. If you are upgrading your Cohesity cluster’s software version and it’s connected to Helios, you can do it directly from the Helios portal.

If you don’t have Support portal credentials, contact your Helios Administrator (see Cohesity Support Portal above).
**Our Software Release Lifecycle**

We regularly release Cohesity software updates, supporting a variety of capabilities—from new features to fixes.

**Cohesity Software Release Types and their Lifecycles:**

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
<th>Lifecycle</th>
</tr>
</thead>
<tbody>
<tr>
<td>Feature Releases</td>
<td>Feature releases deliver new features. A feature release can have major or minor features and fixes. The numbering format for major feature releases follows this pattern: 6.5, 6.6, etc., and minor feature releases follow this pattern: 6.5.1, 6.6.1, etc.</td>
<td>Feature releases (major and minor) are supported for a minimum of 6 months from first availability of the feature release (the General Availability date). Once a feature release is GA, it becomes available via the controlled process (see Release Rollout Process section below). A feature release may earn a LTS designation.</td>
</tr>
<tr>
<td>Maintenance Releases</td>
<td>Maintenance releases deliver fixes (no features) to important issues in a release. They are indicated by a letter at the end of the release number, such as 6.6.0a. Maintenance releases are released as needed, typically every 6 to 8 weeks.</td>
<td>The lifecycle of maintenance releases is aligned to that of a feature release and/or LTS release. Urgent fixes might be addressed with a patch (see below) (which is always included in all subsequent patch or maintenance releases).</td>
</tr>
<tr>
<td>Patch Releases</td>
<td>Patches are urgent fixes delivered for maintenance releases. They are indicated by ‘p&lt;number&gt;’ in the release name and are provided as needed (about every 2 to 4 weeks).</td>
<td>Patches are rolled up cumulatively into the next maintenance release.</td>
</tr>
<tr>
<td>LTS (Long-Term Support)</td>
<td>LTS is a designation made to a feature release (major or minor) when specific stringent quality and stability requirements are met. From the moment a feature release earns a LTS designation, it is referred to as an LTS release. Our goal is to have two LTS releases available to customers at any given time.</td>
<td>LTS releases are supported for a minimum of 12 months from the date of LTS designation and minimum of 6 months of overlapping coverage between two LTS releases and are available to all customers. Customers using LTS releases are encouraged to upgrade to the latest maintenance release as each becomes available.</td>
</tr>
</tbody>
</table>
The diagram below illustrates the software string key.

![Software String Key Diagram]

**Release Rollout Process**

Every feature release (major or minor) is controlled for a period of time after GA and requires Cohesity approval for access. Controlled rollout process provides staged quality gates to ensure the release is stable and suitable for all production environments. Feature releases follow the standard support processes and customers can request access through the account team or Cohesity Support. These releases are only visible to approved customers on downloads.cohesity.com.

**End of Support and End of Life Policy**

For End of Support (EoS) and End of Life (EoL) dates for each Cohesity software release, see the Cohesity Products End of Support and End of Life Information guide.

**Read Our Product Documentation**

We provide a robust, on-demand and detailed knowledge base, accessible right from the Support portal, and product documentation to support your deployment of Cohesity products and many capabilities.

**Submit Your Ideas And Feedback**

Our development teams always appreciate your feedback. Please submit your ideas for new or enhanced Cohesity capabilities through our Support portal.
**Cohesity User Groups**

The Cohesity User Groups is an organization founded on the limitless value of connecting. Data Management professionals come together to network, collaborate, and share experiences. Since our user group started three years ago, it has organically grown to 10 across the US with hundreds of users across finance, healthcare, manufacturing, entertainment and more. There are different ways to consume and contribute to content which includes dedicated podcasts, videos and blog posts. We are also bringing our resources to enable discussion on industry relevant topics and introduce industry leading experts and technologists.

**Cohesity Academy**

Cohesity Academy delivers training, education, and certification in ways that make the most sense for you and your business. We offer self-paced interactive courses, virtual instructor-led training, and instructor-led, dedicated team training. The certifications enable technical professionals to demonstrate their current data management skills as well as mastery of increasingly difficult concepts and tasks that arise in real-world environments. Associate is a recommended foundational-level certification on the journey to being a Cohesity Certified data Management Professional and a Cohesity Certified Data Management Expert.

**Cohesity Product Documentation**

Cohesity Product Documentation provides you access to the latest product documentation to support your deployment of Cohesity products including technical guides and third-party software support matrix for Cohesity Data Protection. You can also access [Cohesity Developer Portal](#) for APIs documentation, learn how to build an App, and browse several samples.
Cohesity Galaxy: Our Customer Community

We're excited to invite you to Cohesity Galaxy, our VIP customer community. It's a great place to get up to speed on our company, network with your peers, and have a little fun along the way!

Join today to:

• Connect with other passionate pros in the industry and bond with Cohesians who care about your success.
• Get first access to events, best practices, product updates, feedback opportunities, and more.
• Earn points for participation, which you can redeem for Cohesity swag, top tech items, and gift cards.

We can't wait for you to join us in the Cohesity Galaxy!

Cohesity Partner Portal

Cohesity is 100% focused with a commitment to building relationships that offer value both to our partners and their customers. We continue to strengthen our ecosystem with a robust set of solution providers, global system integrators (GSI), service providers, and distributors.

Additional Support Services and Resources

The Cohesity Technical Account Manager (TAM) Support Service – Our TAM service helps you get the highest possible value from your Cohesity investment. Cohesity TAMs combine deep industry and product knowledge with best-practice insights from global deployments to ensure the immediate and long-term success of our platform in your environment. When you become a TAM customer, you gain access to a named individual who advocates for your needs, coordinates Cohesity resources for your benefit, and helps to quickly resolve your support issues. TAMs work with you and your team to set goals, share feedback, and drive action. They track requested product enhancements and promote roadmap input internally. The TAM service complements your Support plan. Learn more.

Cohesity Platinum Service – Our Platinum Service provides you with priority handling of support cases and account advocacy through direct access to assigned technical experts. Platinum Service customers have the benefit of additional focused attention and single point-of-contact issue resolution from both a Cohesity Designated Support Engineer (DSE) and a Cohesity Technical Account Manager (TAM). As named individuals, your DSE works on your cases as they arise while your TAM continually advocates for your needs, coordinates Cohesity resources for your strategic planning benefit, and helps your organization quickly resolve open support issues. Platinum Service is an extension of Cohesity's Premium Support plan. Learn more.

Cohesity Resident Engineer Service – Our Resident Engineers are uniquely qualified to assist and advise your team, providing data protection services and helping you administer Cohesity DataPlatform. Each Resident is a Cohesity expert and has received comprehensive product training and certifications to help you integrate your workloads for seamless transition and data protection continuity. Learn more.
**Cohesity Customer Success Program** - Our Customer Success Managers (CSMs) are committed to providing a seamless onboarding experience and process, ensuring you are starting on the right foot. CSMs focus on tooling, reporting, and systems to assist all customers with their success. For specific customers, a CSM may be assigned to guide you on your full Cohesity journey. [Learn more.]

**Cohesity DataPlatform Installation Service** – The goal of this service, for Cohesity DataPlatform and qualified Cisco or HPE platforms, is to help you deploy and integrate Cohesity DataPlatform into your environment, quickly and according to best practices. Cohesity DataPlatform Installation by Cohesity Advanced Services accelerates time to value and helps protect your investment. [Learn more.]

**Cohesity Quick Start Service** – This service provides VMware, SQL, and Oracle configuration to integrate your workloads and provide data protection services. [Learn more.]

**We’re Here For You and Your Organization**

Our motto is customers first. Communicate. Confer. Collaborate. We’re here and ready to assist. Your success matters, so send us feedback, and if you don’t find what you’re looking for here, contact [Customer Success at Cohesity!](mailto:customer.success@cohesity.com) We look forward to working with you.
