

COHESITY ACADEMY

OVERVIEW

What is Cohesity Academy?

Cohesity Academy offers award-winning learning, certifications, and resources to help customers understand, deploy, and optimize Cohesity’s AI-powered data security solutions. Our mission is to empower users to make informed decisions and fully adopt our products. We provide role-based and solution-focused training, interactive eCourses, instructor-led classes with hands-on labs, and world-class certifications to boost technical proficiency.

“

There were features and functionality I did not realize existed in Helios when it comes to securing the environment that I learned [from Cohesity Academy]. The trainer has been great at explaining the material and answering questions during the class. I've made changes and modifications in our environment based on what I learned in the classes.”
