

PRODUCT USE RIGHTS DOCUMENT FOR VERITAS NETBACKUP FLEX SCALE

This Product Use Rights Document ("Document") contains additional terms and conditions (the "Product Use Rights") for the Licensed Software licensed under the Veritas Software License Agreement ("License Agreement") between You as the individual, the company, or the legal entity that will be utilizing the Licensed Software (referenced below as "You" or "Your") and Veritas Technologies LLC. Capitalized terms used in this Document but not defined herein will have the meaning given in the License Agreement. To the extent there is a conflict between the terms and conditions of the License Agreement and this Document, the terms and conditions of this Document will take precedence.

BY DOWNLOADING, INSTALLING OR USING THE LICENSED SOFTWARE, YOU AGREE TO COMPLY WITH THE PRODUCT USE RIGHTS IN THIS DOCUMENT, IN ADDITION TO THE TERMS AND CONDITIONS OF THE LICENSE AGREEMENT. IF YOU DO NOT AGREE TO THE PRODUCT USE RIGHTS APPLICABLE TO THE LICENSED SOFTWARE, DO NOT DOWNLOAD, INSTALL OR USE THE LICENSED SOFTWARE.

For purposes of this Document, the Licensed Software is **VERITAS NETBACKUP FLEX SCALE**.

1. ADDITIONAL DEFINITIONS.

"Cold Disaster Recovery Equipment" means a server and/or processor or device on which the Licensed Software may be installed and configured under a Cold Disaster Recovery License, and which is not production use servicing transactions or requiring workloads during periods of Your normal internal business operations.

"Disaster" means an unforeseen occurrence causing the operation of the applicable systems on which the Licensed Software is used for Production Use, or the Licensed Software installed on such systems, to be substantially impaired or prevented, which occurrence may include but is not limited to fires, earthquakes, floods and computer viruses.

"Failover Readiness Testing" means testing of the procedures for transferring Your production operation from one server to another.

"Gigabyte" or "GB" is defined as the total aggregate amount of data storage capacity and/or computer memory that is managed by the software. One Gigabyte is equal to 10^9 or 1,000,000,000 bytes of data.

"Node" means a physical individual computer, acting as a service or resource provider to client computers by sharing the resources within the network infrastructure.

"Production Use" means any functional operation of the Licensed Software in support of Your normal business operations (such as normal productive use and pre-production testing other than Failover Readiness Testing).

"Tebibyte" or "TiB" is defined as the total aggregate amount of data storage capacity that is managed by the software. One Tebibyte is equal to 2^{40} or 1,099,511,627,776 bytes of data.

Usable storage capacities (14TB Drives)
102 TiB (112 TB)
408 TiB (448 TB)
510 TiB (560 TB)
612 TiB (672 TB)
714 TiB (784 TB)
816 TiB (896 TB)

918 TiB (1008 TB)
1020 TiB (1120 TB)
1122 TiB (1232 TB)
1224 TiB (1344 TB)
1326 TiB (1456 TB)
1428 TiB (1568 TB)

For purposes of defining useable storage capacity, which is calculated based on TiB, note the conversion table above. For example, a license entitlement of 102 equals to actual useable storage capacity of 112 TB.

The Licensed Software is licensed using integer values. The calculated number of bytes may yield a value that requires rounding to be performed in order to present an integer number. In such cases, Veritas will round down to the nearest whole number. For example, when converting from 112TB, this equals to 101.863TiB, and You are required to purchase 102 units of Licensed Software.

“Terabyte” or “TB” means the total aggregate amount of data storage capacity and/or computer memory that is managed by the software. One Terabyte is equal to 10^{12} bytes, or 1,000 Gigabytes or 0.90949470177293 Tebibytes of data.

“Testing Day” means a period of twenty-four (24) consecutive hours, or any lesser portion of such twenty-four (24) hour period.
