Cohesity CERT (Cyber Event Response Team)

From crisis response to lasting resilience

Overview

True cyber resilience starts before an attack ever occurs. Cyber threats exploit people, process, and technology gaps. Waiting to discover weaknesses after an attack is not sustainable and leaves your organization exposed to significant risk.

Cohesity CERT cyber resilience consulting services help you proactively assess risk, harden defenses, and build an actionable roadmap across governance, people, processes, and technology—reducing exposure to ransomware, data theft, and costly downtime.

When an incident occurs, CERT delivers **rapid response** with proven data recovery. From the earliest stages of an attack, our team works alongside your incident response team to investigate, remediate, and restore operations quickly and confidently.

With Cohesity CERT, you gain a partner committed to keeping your business resilient and achieving its digital transformation goals, even in the face of today's toughest cyber threats.

Key Benefits

- Reduced risk from ransomware, data theft, and prolonged downtime
- Reduced downtime and data loss
- Secure and faster data recovery
- Streamlined incident response

Proactive resilience

Our proactive cyber resilience consulting services, such as ransomware resilience assessments and tabletop exercises, help you benchmark maturity and develop a pragmatic, actionable roadmap to strengthen defenses and reduce risk.

Rapid response to cyber threats

Cohesity CERT is available 24/7 to assist in the event of a cyberattack. Because time is critical when facing a breach, our team acts swiftly to:

- **Threat containment:** Stop further damage to your backup environment and preserve data integrity.

- **Forensic analysis:** Investigate the impact of a breach on your backup infrastructure, determine its cause, and recommend a mitigation plan to prevent reattack–your IR partner to accelerate the process.

- **Compliance and reporting:** Provide the information necessary to help you meet regulatory obligations and breach notification requirements.

- **System restoration:** Provide expert guidance to recover, rebuild, and secure your systems so only clean, verified data is recovered to production.

CERT service	Cohesity Data Cloud packaging (Core and Enterprise editions)
Cyber resilience consulting Expert-led engagements such as ransomware resilience assessments and tabletop exercises	Premium service
Rapid response Incident response and recovery support available 24/7/365	Included at no additional cost

Why engage with Cohesity CERT

- **Industry-specific expertise:** Our team brings experience across multiple sectors, ensuring we understand your unique environment and challenges.

- **Operational fluency in your environment:** As your trusted data security partner, we already understand your systems and infrastructure, giving you an insider-level advantage that cuts delays and accelerates your response during critical moments.

- **Streamlined response with your IR partner of choice:** We've partnered with the world's leading cybersecurity incident response firms, ensuring you have the knowledge and tools to investigate and respond seamlessly to cyberattacks.
