

LOGO GUIDELINES

APRIL 2025

COHESITY

LOGO

USAGE

There are four approved versions of the Cohesity logo, each one optimized for different background color use cases.

Use the black and green logo on white/light backgrounds (print and digital). Use the white and green logo on black/dark backgrounds (digital only).

All-black and all-white logos are for general use. It is not mandatory to include the green S mark.

USING THE “S” AS A MARK

The “S” mark serves as a brand symbol and is meant to be used selectively. For example, when space constraints prevent you from using the entire Cohesity logo. Or, in a specific context such as an app dashboard. It is a trademarked symbol and should be treated with the same care as our company name and logo. Never use to replace the letter S in a word.

LOGO

CLEAR SPACE

There should always be clear space around the logo to ensure maximum impact and create visual separation from other logos, copy, illustrations, and photography. As shown, the logo height can be used as a guide to establish clear space. Always maintain this minimum clear space, even when proportionally scaling the logo.

MINIMUM SIZE

Print: no smaller than 1.25" wide @300dpi

Digital: no smaller than 90px @72dpi

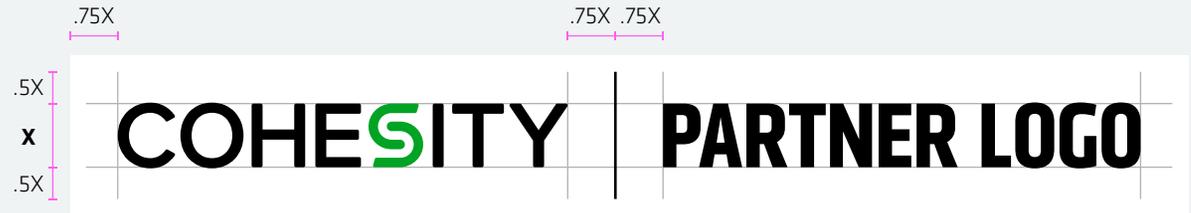

1.25" (90px)

LOGO

CO-BRANDING

When the Cohesity logo appears as part of a lockup with another logo, both logos should maintain equal visual weight and be separated by a thin divider line (scale proportionately). A co-branding logo template can be provided upon request.
