

Cohesity DataPlatform

Cohesity DataPlatform™ consolidates data and applications including backups, files, objects, dev/test, and analytics on a single, software-defined platform. Inspired by web-scale architecture, DataPlatform is a scale-out solution based on a unique distributed file system, SpanFS®. DataPlatform modernizes and simplifies data and application management by providing one platform for multiple workloads. Although most organizations begin their journeys to overcoming mass data fragmentation by simplifying data protection, DataPlatform’s flexible architecture allows easy expansion to additional use cases, further increasing operational simplicity and improved TCO. Because DataPlatform is a software solution, it works equally efficiently on-premises on qualified Cisco, HPE, Pure Storage, Dell, or Cohesity hyperconverged platforms as well as in the public cloud.

Web-Scale Simplicity and Efficiency

The flexible, resilient, and on-demand web-scale benefits pioneered by hyperscalers such as Google are now available to enterprises with DataPlatform. The solution eliminates unnecessary data silos and spans workloads as it converges data on a single platform. It accommodates data growth by delivering scale-out file and object storage in a limitless, pay-as-you-grow model without disruptive upgrades.

Easy, Cloud-Ready Deployment

DataPlatform is cloud-ready, ensuring seamless and rapid data and application mobility with leading public cloud providers including Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform. Take advantage of public cloud elasticity and economics using policy-based automation for archiving, tiering, and replication to the cloud. Move virtual machines (VMs) to the cloud for dev/test and then back again when ready.

One Platform, Endless Possibilities

DataPlatform is powered by a patented distributed file system architecture, making it much more than a modern converged target for backup data. It can be used to recover applications instantly from any point in time to meet business SLAs. Cohesity and third-party applications also simplify file data search, speed eDiscovery, and streamline compliance. Built to support an API-first approach, DataPlatform integrates with leading automation solutions and custom business scripts to increase operational efficiency.

Specifications

Hyperconverged Architecture	<ul style="list-style-type: none"> • Cohesity SpanFS, a distributed file system • Web-scale architecture with unlimited scalability • Non-disruptive upgrades • Unlimited, distributed snaps and clones with no performance impact with Cohesity SnapTree 				
Multiprotocol Support	<ul style="list-style-type: none"> • Distributed volumes with multiprotocol NFS, SMB, and S3 access • Support for simultaneous sequential and random IOs 				
Storage Efficiency	<ul style="list-style-type: none"> • Global deduplication across all nodes, variable length, inline, or post-process • Compression, including Zstandard • Erasure coding 2:1, 4:2, and 5:2, and replication factor 				
Data Resiliency	<ul style="list-style-type: none"> • Strict consistency across nodes within a cluster, ensuring data resiliency and that reads always return the most recent data • Two node and two disk fault tolerance support 				
Use Cases	<ul style="list-style-type: none"> • Backup and recovery 	<ul style="list-style-type: none"> • Files and object storage 	<ul style="list-style-type: none"> • Analytics 	<ul style="list-style-type: none"> • Long-term retention 	
Use Cases	<ul style="list-style-type: none"> • Target Storage 	<ul style="list-style-type: none"> • Security and compliance 	<ul style="list-style-type: none"> • Dev/Test 	<ul style="list-style-type: none"> • Disaster recovery 	
Supported Applications	<ul style="list-style-type: none"> • Cohesity DataProtect – DataPlatform is the foundation for DataProtect’s delivery of comprehensive data protection for all workloads, anywhere on a single platform that converges backup, recovery, replication, and target storage with fast RPOs and near-instant RTOs • Cohesity Helios – SaaS-based global data and apps management for Cohesity environments • Cohesity Developed Apps – Native applicants including Pattern Finder, Password Detection, Video Compressor, and other containerized applications from the Cohesity MarketPlace. • Third-Party Apps – Including Splunk, SentinelOne, Cristie, and more from the Cohesity MarketPlace. • Custom Apps – Develop custom apps using Cohesity’s App SDK 				
Global Search	<ul style="list-style-type: none"> • Automated global indexing • Wildcard searches for any VM, file, or object on the platform 				
Flexible Deployment	<ul style="list-style-type: none"> • Software-defined solution for on-premises, public cloud, and edge sites • Private cloud/data center – Hyperconverged storage appliances, supporting qualified Cisco, HPE, Pure Storage, Dell, Fujitsu, Intel and Cohesity hardware • Virtual Infrastructure - DataPlatform for virtualized infrastructure (VMware vSphere) • Public cloud – DataPlatform Cloud Edition for a variety of use cases in leading public clouds • Remote/edge sites – Simplified data and applications management with DataPlatform for Edge 				
Public Cloud Integration	<ul style="list-style-type: none"> • Native cloud integration with all leading public clouds including AWS, Microsoft Azure, Google Cloud Platform, and any S3 compatible clouds, as well as AWS Govcloud and Microsoft Azure GovCloud 				
Global Management	<ul style="list-style-type: none"> • Cohesity Helios for multi-cluster, global active management 				
Integration & Automation	<ul style="list-style-type: none"> • API-first architecture 	<ul style="list-style-type: none"> • RESTful API 	<ul style="list-style-type: none"> • PowerShell Module 	<ul style="list-style-type: none"> • Python SDK 	<ul style="list-style-type: none"> • Ansible
Integration & Automation	<ul style="list-style-type: none"> • OpenAPI standard 	<ul style="list-style-type: none"> • VMware vCloud Director (vCD) 	<ul style="list-style-type: none"> • VMware vRealize (vRA/vRO) 	<ul style="list-style-type: none"> • ServiceNow 	
Encryption	<ul style="list-style-type: none"> • Software AES-256, FIPS compliant encryption of data in flight and at rest 				

Capabilities	DataPlatform Base	DataPlatform Standard	DataPlatform Premium
Enterprise-class Storage			
Unlimited Scalability (web-scale)	✓	✓	✓
NFS, SMB, S3, Multi-protocol Support	✓	✓	✓
Non-disruptive Software Upgrades	✓	✓	✓
Non-disruptive Add/Remove Nodes/Blocks	✓	✓	✓
Unlimited, Distributed Snaps	✓	✓	✓
Unlimited Clones	-	✓	✓
Multi-Tenancy	✓	✓	✓
App, Infrastructure Dev/Test	✓	✓	✓
User Quotas, Storage quotas	-	✓	✓
I/O Boost	-	-	✓
All-Flash	-	-	✓
Capacity Optimization			
Global Variable-Length Dedupe	-	✓	
Compression	-	✓	
Data Integrity			
Data Resiliency w/ Strict Consistency	✓	✓	✓
Two Node and Three Disk Fault Tolerance Support	✓	✓	✓
Chassis or Rack Fault Tolerance Support	✓	✓	✓
Automated Data/App Mobility			
Archive to Cloud/On-premises	✓	✓	✓
Automated Data Tiering	✓	✓	✓
Make Data Productive			
Cohesity Native Apps (AWB)	✓	✓	✓
Cohesity Marketplace Apps	✓	✓	✓
Security			
Datalock - WORM for Security	-	✓	✓
Encryption AES-256 (In-flight / at rest)	✓	✓	✓
Supported Environments			
Public Cloud	✓	✓	✓
Physical (on certified appliances)	✓	✓	✓
Virtualized	-	✓	-
Edge/ROBO	-	✓	-

Capabilities	DataPlatform Base	DataPlatform Standard	DataPlatform Premium
Supported Workloads			
Backup Target	✓	✓	✓
IOT Big Data	✓	-	-
Video Surveillance	✓	-	-
Healthcare Pacs	✓	-	-
Hadoop and Splunk Cold Buckets	✓	-	-
Archive	✓	✓	✓
