

Cohesity Data Protection for Oracle Database Administrators

The Cohesity Data Protection for Oracle Database Administrators class is a one-day technical class focused on teaching database administrators how to best utilize Cohesity DataProtect to protect their databases.

The course is structured to be flexible to match the use cases that customers may encounter. After providing an overview of Cohesity DataProtect and its features, students will be introduced to concepts realized with Cohesity's revolutionary platform.

Topics covered will include common and advanced workflows for Oracle.

Data Protection for Oracle Database Administrators Training
