

Migrate, Protect, And Do More with Your Data

Data Management as a Service (DMaaS) simplifies how data is backed up, secured, governed, and analyzed through an easy-to-use portfolio of SaaS solutions that help reduce the infrastructure burden. MeriTalk, in partnership with Cohesity and AWS, digs into the challenges of Federal data management, the benefits of DMaaS, and how Cohesity with AWS can help.

Growing Dependency on Cloud

86%

of **Federal IT managers** say a cloud-based infrastructure is essential,¹

But

84%

have concerns about **data management in cloud environments**¹

69%

of **public/private organizations** report a cloud visibility gap

The challenge:

Too much data, in too many places, with too much cost, complexity, and risk

DMaaS helps simplify cloud data management with a single management platform and UI.

Democratizing Data Needs

94%

of **Feds** are increasingly focused on the importance of data to the mission⁴

But only **51%**

say their governance policies are "very consistent" across workloads⁴

90%

agree **centralized data control** is the key to consistently protecting data

DMaaS helps protect data with automated failover and failback orchestration for mission-critical workloads

We need to get data from where it is and into the hands of operators that can do something with it.

Mike Horton, CDO, DHS Office of the CIO

DMaaS Delivers

95%

of **Feds** will prioritize cloud data governance improvements over the next five years⁴

• **Seeking consistency** across platforms, automated security policies, and a deeper understanding of their environments⁶

DMaaS helps manage your data from development to analysis, including backup, disaster or ransomware recovery³

Peek at the private sector:

89%

of **senior IT leaders** are likely to consider a DMaaS solution

DMaaS helps accelerate migration of on-premises data and workloads to AWS with cloud native integration

The Cohesity and AWS DMaaS solution empowers Federal agencies to accelerate migrations, simplify hybrid cloud data management and eliminate silos:
