

Please see [Cohesity's blog](#) for important information about this warranty.

Cohesity's 2x Larger Ransomware Warranty

We are offering to match any of our competitors' published ransomware warranty/guarantee offerings, with one important difference: we will agree to DOUBLE any monetary liability limitations or other "caps" offered by our competitors. For example, if our competitor would offer you a \$5 million dollar cap, Cohesity will agree to a \$10 million dollar cap.

Important Conditions

1. This is an offer to enter into an agreement that matches published terms currently offered by a Cohesity competitor (including without limitation all eligibility, security, and best practice requirements and exclusions).
2. By necessity, such terms would need to be adapted to reflect Cohesity's products and practices. We commit to make such adaptations collaboratively and in utmost good faith to give you terms at least as beneficial as the applicable competitor warranty/guarantee on new purchases of comparable products (and in all cases we will agree to double any dollar caps or other liability limitations).
3. This warranty/guarantee may not be used as a substitute for having an appropriate and responsible cyber security program and is not a replacement for cyber insurance.
4. The warranty/guarantee will be enforceable only when you have a mutually signed agreement with Cohesity specifying adapted terms.

Effective Date: April 1st, 2024

COHESITY
