

Customers Trust Their Microsoft 365 Data to Cohesity

Simplify your Microsoft 365 (M365) data protection with a service. Protect critical M365 business data while freeing up valuable IT time. But don't take our word for it. Read what satisfied Cohesity customers have to say.

"The day-to-day operational data that we manage in healthcare is too important to rely only on the backup capabilities delivered by key SaaS providers (Microsoft Exchange Online, OneDrive). We are happy with Cohesity helping us to broaden this capability! Cloud services and **Cohesity give us peace of mind** that we can easily recover not only mailboxes but individual files quickly and at scale whenever we need them without limitations."

Curt Kwak
CIO

Duane Morris

"Simplicity and flexibility are why we chose Cohesity DataProtect delivered as a Service to protect our Microsoft 365 data. We use Cohesity to back up our on-premises databases and extending protection to Microsoft 365 through the DataProtect service is simple and easy. With Cohesity we have a **single backup solution that covers hybrid** and multicloud workloads."

John Sroka
CIO

"We use Microsoft 365 with its built-in retention policies, but that isn't robust backup. We count on Cohesity for **robust, reliable backup** of our Exchange Online user mailboxes onsite as an additional fail-safe so if something happens—like ransomware—we have a way to quickly recover mailboxes, files and sites."

Ken Watt

Senior Infrastructure Specialist

"We adopted Microsoft 365 SharePoint for our next-generation Intranet platform and have **more confidence in fast data restores** because we complement it with Cohesity."

Carl Holzhauer

Infrastructure Manager

"Cohesity helped us to transform our backup and recovery process and tap into the advantages of public cloud infrastructure with Microsoft Azure. With the extended capabilities for Microsoft Office 365 and OneDrive, we are able to **ensure consistent availability of data** for our company."

Brian Critchlow

IT Systems Administrator

GES SYSTEMHAUS

“Cohesity has improved our IT services for clients. We can offer backup as a service for on-prem applications as well as SaaS applications like Microsoft 365. Ransomware protection gives our customers peace of mind, and cloud backup eliminates the considerable costs of running a dedicated backup data center.”

Steffen Maurer

Head of IT Services, GES Systemhaus

“Cohesity helped us eliminate our existing storage filer and it does everything we need it to do for backups—all for **30–40% less than other data management solutions**. It’s fun to work with a company actively delivering capabilities fast, like backup for Microsoft 365, that provide real value to customers at no additional cost.”

Josh Van Camp

Network Administration Supervisor
