

Making Migration Simple

Veritas NetBackup Migration Service

Moving to Cohesity’s modern backup and data management platform from Veritas NetBackup has never been easier or more affordable. Cohesity’s NetBackup Migration Service (for active data) is designed to simplify and accelerate value customers receive by switching to Cohesity.

Cohesity Advanced Services employs a prescriptive migration methodology with automated tasks at key points of the process to simplify migration of your backup and recovery whether on-premises, at the edge or in the public cloud.

Our Approach

- Inventory Existing NBU Clients, Storage Lifecycle and NBU Policies
- Discover and document the following:
 - Data Protection Schedule, Retention and Encryption requirements
 - Client types (Windows, Linux, SQL, etc.) and determine Cohesity Agent Installation requirements
 - Long-Term Data Retention and Cloud Archive or NAS Backup requirements
 - Firewall, Active Directory and DNS requirements
 - Replication, Protection Policy and Job requirements
- Create Solution Design
- Implement Data Protection Architecture
- Migrate data and begin protecting on Cohesity
- Perform Sample Data Recovery using Cohesity
- Provide AsBuilt Documentation

KEY BENEFITS

- *Experienced Cohesity Advanced Services Professional Installation and Configuration according to best practices*
- *Quickly enable your system for production use with swift transition of workloads onto Cohesity’s environment – for accelerated overall time-to-value*
- *Integrate with chosen technologies*
