

Cohesity and Tata Consultancy Services (TCS)

A Strategic Partnership for Next-Gen Data Management

Key Benefits

- Lower TCO
- Improve performance
- Reduce data center footprints
- Streamline compliance
- Improve business continuity and resilience

Introduction

Today's successful enterprises are adopting a data-driven culture to make informed business decisions, optimize performance, become customer-centric and drive growth. The global pandemic accelerated the move to hybrid cloud, which empowers businesses with the flexibility, resilience, and agility they need to meet unexpected demands. This pivot also is contributing to the proliferation of data across different locations, infrastructure, and management systems—all of which can impede IT effectiveness. Data silos prevent an organization from using data as a competitive advantage, increase security and compliance risks and lead to business disruption.

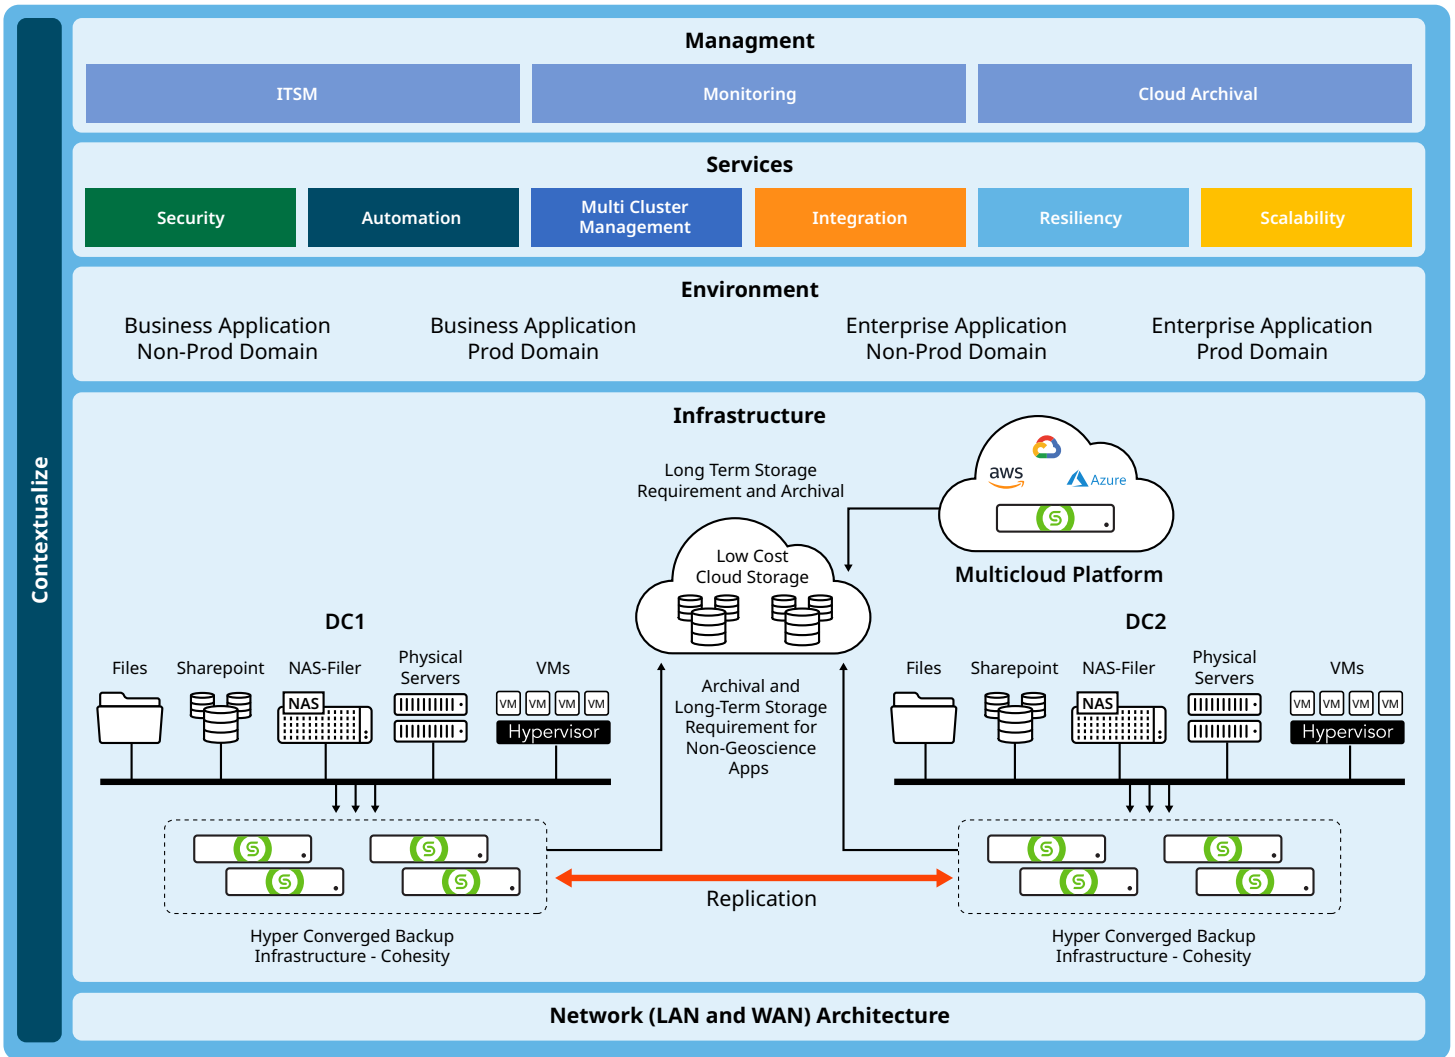

Cohesity and TCS have partnered to provide proven cloud-native data management solutions. Cohesity integrates with TCS' cloud frameworks to help ensure enterprises unlock the full potential of their data, spanning across cloud and on-premises servers to accelerate digital transformation. TCS' global digital transformation capabilities and cloud expertise integrated with Cohesity's next-gen data management solutions help customers simplify data management and unlock new value.

Partnership Highlights

- Proven Data Management as a Service (DMaaS) offering
- Investment in lab showcasing joint capabilities
- Joint solutions integrated with TCS Cognix™
- Valuable points of view and proofs of concepts for multiple use cases (e.g., backup and recovery, NAS, etc.)
- Standard reference architectures for faster deployments
- Marquee customers across diverse industries

Best-in-class Data Management Solutions by Cohesity and TCS

TCS Cognix™, an AI-driven human-machine collaboration suite, leverages Cohesity next-gen data management platform solutions to accelerate customers' digital transformations. TCS Cognix™ delivers data management services to enterprises via agile, adaptable, autonomous, and resilient (A3R) solutions for data center, hybrid infrastructure, and emerging niche technologies. Cohesity Helios integrates with the A3R Framework to protect, detect, and rapidly recover data, reducing downtime and improving business continuity.

Why Cohesity and TCS?

- **Superior user experience** – Fast provisioning through self-service modules, automated interfaces, and standardization
- **Readily available global labs** – Investment in labs that perform proofs of concepts to build business use cases on next gen platforms and technologies
- **Proven solutions** – Readily available resources, including reusable automation libraries, reference architectures, best practices, and solution accelerators
- **Built for cloud** – SaaS solutions available in flexible consumption models
- **Global digital transformation capabilities and cloud expertise** – TCS and Cohesity have robust, certified talent pools with an expertise across all major cloud platforms.

Joint Success Stories

U.S.-based federation, which manages a group of health insurance companies, transformed its legacy data landscape to Cohesity Helios with cloud archiving. The solution met customer's security and compliance requirements with end-to-end data protection and disaster recovery.

Canada's largest producer of clean electricity adopted Cohesity to replace multiple legacy backup products. The solution enabled support for multiple workloads, applications, and seamless integration with Microsoft Azure.

U.S.-based investment bank and financial services holding company transformed its legacy and siloed data landscape to Cohesity Helios. The customer reduced its data center footprint and simplified data management and data security.

About Cohesity

Cohesity radically simplifies data management. We make it easy to protect, manage, and derive value from data—across the data center, edge and cloud. We offer a full suite of services consolidated on one multicloud data platform: backup and recovery, disaster recovery, file and object services, dev/test, and data compliance, security, and analytics—reducing complexity and eliminating mass data fragmentation. Cohesity can be delivered as a service, self-managed, or provided by a Cohesity-powered partner.

About Tata Consultancy Services

Tata Consultancy Services is a purpose-led transformation partner to many of the world's largest businesses. For more than 50 years, it has been collaborating with clients and communities to build a greater future through innovation and collective knowledge. TCS offers an integrated portfolio of cognitive powered business, technology, and engineering services and solutions. The company's 500,000 consultants in 46 countries help empower individuals, enterprises, and societies to build on belief. Visit www.tcs.com and follow TCS news @TCS.
