HPE GreenLake with Cohesity

Cyber Resilient Data Management in an Edge-to-Cloud Platform

Benefits of Cohesity-HPE Solution

- Eliminate multiple point solutions with a single enterprise-class data cloud platform

- Safeguard your data with built-in security features and ransomware protection

- Simplify management with a single user interface across edge, core and cloud

- Accelerate hybrid/multi-cloud initiatives with native support for leading public clouds

- Do more with your backup and unstructured data, leveraging it for more business insights

Today, consumer cloud experience has shaped what business leaders expect from enterprise IT. And digital transformation with the resulting explosion in volume of data has created a data security and management challenges. How can your organization better meet increasing demands for greater flexibility and easy access to data while improving cyber resiliency, containing costs and maintaining control?

HPE GreenLake with Cohesity helps you solve the data vulnerability and fragmentation problems reduce recovery time and do more with your data by combining the simplicity of Cohesity and HPE data management solutions with the flexibility of the HPE GreenLake as-a-Service model. An efficient, enterprise-class data platform offered in a cloud-like, pay-per-use[1] experience, our joint solutions can help you secure, manage, protect and gain insights from your non-latency sensitive data. HPE GreenLake with Cohesity is consumption-based[1] data security and management in your data center, on the edge, or in a co-location facility for worry-free backup, disaster recovery, file and object services, dev/test, analytics, and archiving across hybrid and multicloud environments.

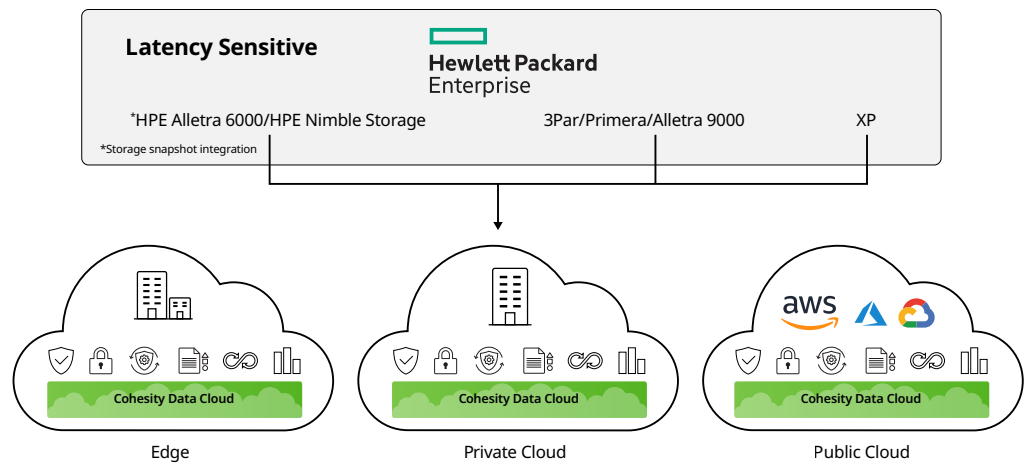

Figure 1: Cyber resilient data management with Cohesity software on HPE servers

Increase Business Agility

- Accelerate application development by focusing on business outcomes not the underlying IT

- Boost efficiency and manage risk with no wasted spend

- Keep your capacity ahead of demand and easily adapt to changing business needs

Simplify IT

- Leverage HPE resources and expertise and enable your team to focus on innovation

- Reduce time to value by quickly deploying additional capacity, upgrades and add-ons

- Simplify procurement and support with a single trusted source

Lower IT Costs

- Move to monthly cost model without up-front investments

- Avoid overprovisioning, paying only for what you need today[1]

- Reduce operational burden and costs with a single easy-to-use management interface

Better Control

- Keep data in your environment for privacy and control while still reaping cloud benefits

- Improve performance and adhere to strict security, compliance and SLA requirements

- Lower risk with resilient infrastructure and share responsibility for success

HPE GreenLake with Cohesity helps your organization align costs to business outcomes. Track your usage in the HPE Consumption Analytics Portal to optimize your performance while ensuring there's capacity ahead of demand. Achieve faster time to value for your data and apps deployment, fueling the innovation your business needs for digital transformation. You can avoid up-front investment and overprovisioning, as well as easily align cash flow to usage while boosting security, visibility and control of your data.
